

WE ARE ROBOTICS FOR YOUTH

• WHO IS THE PROGRAM FOR?

Our program is designed for high school students who have yet to decide which university to go to and which field to choose.

• HOW DO WE REACH OUR AUDIENCE?

We reach our audience by organizing practical workshops for schools and camps for teens.

• OUR RELATIONSHIP WITH YOUTH

We aim to transfer our knowledge to youth as peers or older siblings in order to make learning more personal and less formal. We also intend to spread our enthusiasm for technology and motivate young people with our personal stories.

• OUR PARTNERS

We partner with NGOs in various European countries focused on youth work. We also provide information to the students about internships and opportunities funded by the EU.

• RESOURCES

To our camp participants, we offer accommodation and food for extra price. During our workshops, we are using a total of 10 robotics set, 10 IoT sets and we have 5 laptops to borrow to students that do not have one.

ACTIVITIES

Activities at our workshops consist of practical experimenting with small robotics & IoT sets. For the more advanced individuals, we offer coaching and mentoring for team projects and hackathons, as well as work & internship offerings.

Motivating Youth

Offering Internships

Teaching about technology

Mentorship for individual project
