

# Ćaci

## Reason.

The recent situation that has been going on related to Serbian manifestations

## What it does

It tracks when government is going to use some weapon and we ping that in an external server to alert people. Along with that we destroy and intercept communications to slow it down.

## Consequences.

Serbian lifes could be saved.

## How to spread

Physically infect computers using USB Pens to inject them at people that works at internal security department of Serbia.

## How it works

When a weapon request is sended to their client, we track and intercept it to send to our servers, with that we are able to spread this information throught text message so everyone can know, and also slow down their operation
