

Gender

Made by:

TEAM 2

Gender Identity vs Sex

- Sex: Biological characteristics (chromosomes, hormones, anatomy)
- Gender Identity: How a person internally identifies (man, woman, non-binary, etc.)
- Difference: Sex is assigned at birth, gender identity is self-perceived

Gender Roles

- Social expectations based on gender
- Influence how people should behave, dress, or interact
- Often shaped by culture, tradition, and media

Gender Stereotypes

- Simplified, rigid beliefs about genders
- Examples: 'Men are strong, women are emotional'
- Limit personal expression and opportunities

Problems Related to Gender

- Discrimination and inequality
- Gender-based violence and harassment
- Wage gap and limited opportunities
- Mental health challenges due to pressure

Solutions

- Promote gender equality and inclusivity
- Challenge stereotypes through education
- Encourage diverse role models
- Support policies against discrimination
- Foster open dialogue and respect

Thank you for
your
attention!!!!!!

Co-funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or Jaunimo Reikalų Agentūra. Neither the European Union nor the funding authority can be held responsible for them.
